

Work experience_

Analyst Developer

July 2017 - Present

aariXa's development stack includes: Angular, .NET Core, MS SQL, Azure, Windows Server, ... so mainly focused on Microsoft technologies. I have been working on a new Cloud Native, realtime, multi-tenant web app hosted as microservices which run in Docker containers as an in-house developer.

I have migrated aariXa's existing Dynamics CRM 2011 to a new .NET based CRM package and customized the CRM with new business logic.

As one of the few in-house developers, I've also been doing some DevOps and system administration. Moving existing applications to new containers or virtual machines, but also monitoring and maintaining aariXa's infrastructure.

Mainly used skills

Angular TypeScript C# .NET Core SQL Server Docker Azure Windows Server
Ubuntu Server Azure DevOps

Consultant for CTG on behalf of Bridgestone Europe

October 2016 - June 2017

I have worked on a project for Bridgestone as CRM Developer, customizing Dynamics 365 CRM with business logic. Like writing plugins in C# and building custom UI components and apps with TypeScript, Knockout.js and many more of the latest technologies.

Mainly used skills

Dynamics 365 CRM C# TypeScript HTML5 CSS3 SASS

Certification_

Microsoft Exam 70-483 - Programming in C#

September 21, 2018

Education_

Professional Bachelor's Degree in Applied Computer Science

September 2013 - June 2016

I studied Applied Computer Science at university college PXL, Hasselt.

Specialization track: Application Development - Web & Mobile
